

Mono *EAS* System

Store security made easy

powered by **Checkpoint**

Mono **EAS SYSTEM**

SHRINKAGE – AN EXPENSIVE PROBLEM

Studies indicated that shrinkage (loss of goods along the supply chain) cost retailers US\$100 billion or 1.4% of sales a year. This represents approximately 20% of retail profit and the impact is significant in today's competitive environment. Combating shrinkage and theft is a definite priority.

MONO SYSTEM – AN AFFORDABLE SOLUTION

Sidep, acquired by Checkpoint offers a good range of Electronic Article Surveillance (EAS) systems. Fulfilling Checkpoint's expectation on quality, Sidep's Mono System provides a cost-effective solution which gives reliable detection and is fast and easy to install and maintain. Key features include:

Ease of use

Mono is a "plug and play" system that can be quickly installed and easily maintained without professional supervision. A basic adjustment is carried out at installation without the need for specialized tools. For easy integration, no synchronization cable is required for under 5 antennae. All this makes the Mono system easy for store employees to use, operate and maintain.

Auto-adjusting capability

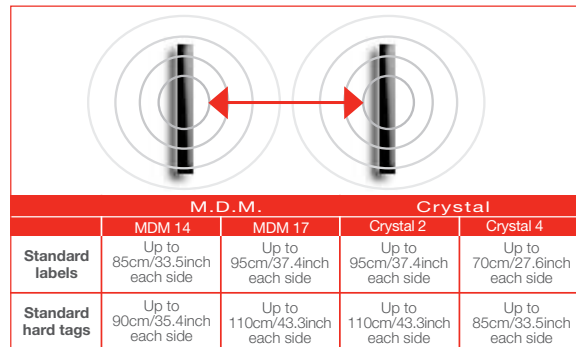

With the Auto-Adjusting Digital Signal Processing (DSP) technology, sensitivity automatically adjusts to filter temporary spikes in noise levels in different store environments and situations. This ensures an efficient and reliable detection.

Good detection performance

The necessary coverage and protection for a standard entrance doorway can be provided for with just one Mono pedestal. The single antenna detects on both sides with maximum detection of 110cm/43.3inch each side with recommended tags or labels.

Detection Area on each side of pedestals

Attractive design

The Mono system is available in a smart stainless steel (M.D.M) or an elegant crystal (Crystal) frame that can be customized to complement different store interiors while providing discreet protection.

While the Mono system is an ideal cost-effective solution for small boutiques, apparel stores and bookstores, its ease of use and wide aisle detection applicability also make it an appealing option in hypermarkets and supermarkets.

TECHNICAL SPECIFICATIONS

Crystal Mono-system

Crystal 2
 Height : 163cm/64.2inch
 Width : 37.5cm/14.8inch
 Depth : 2.5cm/0.98inch
 Base : 39 x 11.5cm/15.4x4.5inch

Materials :

Clear acrylic Panel with metal base and plastic housing (gray or white)

Crystal 4
 Height : 155cm/61inch
 Width : 29cm/11.4inch
 Depth : 2cm/0.79inch
 Base : 24.4 x 10cm/9.6inchx3.9inch

Materials :

Clear acrylic Panel with metal base and plastic housing (white)

M.D.M Mono-system

M.D.M 17
 Height : 170cm/66.9inch
 Width : 38.9cm/15.3inch
 Depth : 3.2cm/1.26inch
 Base : 37 x 6cm/14.6x2.4inch

Materials :

Stainless steel/Gray Epoxy Paint

M.D.M 14
 Height : 140cm/55.1inch
 Width : 38.9cm/15.3inch
 Depth : 3.2cm/1.3inch
 Base : 37 x 6cm/14.6x2.4inch

Materials :

Stainless steel/Gray Epoxy Paint

Checkpoint

Your Shrink Management Partner

Checkpoint Systems is the leading supplier of shrink management solutions. Checkpoint's global team partners with retailers to reduce theft, increase inventory visibility and provide customers with greater merchandise availability through a combination of advanced RF technology, a broad merchandise protection program, added-value software and real-time labeling solutions.
