

Micro PST replaced 2410

Theft of high value, small items has been increasing. EAS tagging of high loss items is a proven method of protection to fight theft, however, until now there wasn't an acceptable market solution for these items.

EP CLEAR Series - The latest addition 2410 Micro EP PST Tamper Tag is ideal for protecting small high-risk items such as cosmetics, consumer packaged goods, and other accessories from theft.

- Proven to **reduce** shrink by 25%*
- Proven to **increase** sales by 6% or more*
- Utilizes "Micro Technology" to offer enhanced **performance** with a small size
- Clear face provides **visible protection** and strong visual **deterrence**
- Clear window promotes brand and aesthetic retention
- Tamper **resistant** adhesive bonds securely with packaging
- **Effectively** combats ORC by reducing resale value when removal is attempted, and identifying lost items when label adhered
- **Custom printing** available; branding, store information, logos and more!
